SUMMARY

AI-augmented Full-Stack developer with experience building scalable and reliable web solutions at Chubb, KCPL. Focused on building clean architecture and performance-driven systems.

EDUCATION

B.Tech, Information Technology

Graduated July 2024

Kalinga Institute of Industrial Technology, Bhubaneswar, Odisha

CGPA 9.10

Student Coordinator for **National Service Scheme**, coordinating multiple drives for over **600** students

TECHNICAL SKILLS

Languages: TypeScript, Java, JavaScript, Python, C++ **Front-end:** React, Angular, Next, MaterialUI, PrimeNG

Back-end: Node.js, Spring Boot, MongoDB, Socket.io **Tools:** JIRA, Git, GitHub, JUnit, Jest

Cloud: Azure, Kubernetes, Docker, Jenkins,

AI/ML Tools: Claude Code, TensorFlow

PROFESSIONAL EXPERIENCE

Chubb Engineering, Hyderabad, India: Software Engineer

Sept 2023 - Present

- **Drive AI-assisted** development practices: use **Claude Code** and LLMs for faster feature delivery, code reviews, and documentation; **built tooling** that improves onboarding and context for AI coding assistants.
- **Accelerated product onboarding by 75%** through development of **scalable full-stack solutions** using Angular, Java, Quarkus, and Kubernetes.
- **Built and maintained reusable UI components**, improving **development efficiency** and ensuring alignment with Chubb's internal **UI framework**.
- **Increased code quality** by introducing **unit testing practices**, boosting coverage from 0% to **85%+** across **frontend and backend** codebases.
- **Optimized performance** with **caching** and **NgRx store**, cutting load times by **30%**, and contributed to **micro-frontend architecture** and **backend API development**.
- **Led and mentored 10+ developers/interns**, driving **clean coding practices**, **code reviews**, and cross-functional collaboration; organized large-scale internal tech events and delivered award-winning solutions.

KCPL, Kolkata, India: Software Engineering Intern

May 2022 - Jan 2023

- **Delivered end-to-end solutions** by building **web solutions** on React.js, optimizing **SEO**, and architecting **scalable, cloud-based systems** for reliable data storage and maintainability.
- **Automated business workflows** (sales, warehousing, purchase, and stock) using **Python** and **Excel VBA**, streamlining operations and **eliminating single points of failure**.

PROJECTS

Vatana

- **Designed & developed** an end-to-end **grocery shopping platform** with secure **JWT authentication**, core **e-commerce features**(cart, wishlist, payments via Razorpay),and a modern **Angular+Bootstrap UI**.
- Built a **comprehensive admin dashboard** for **real-time order tracking**, **inventory management**, and **earnings insights**, ensuring scalability and a seamless user experience.

RecruitMate

- **Automated interview scheduling** for large-scale hiring drives with features like **role management**, **advanced filtering**, **error handling**, and **reporting**, reducing manual effort by **98%**.
- Successfully **scheduled 750+ interviews**, enabling scalability, reliability, and freeing HR teams to focus on strategic tasks.

GreenScan

- Collaborated in a cross-functional team to build a **real-time plant disease detection model** using **TensorFlow Object Detection API**, **Python**, and **FastAPI**.
- Integrated **web scraping pipelines** for dataset generation and streamlined deployment for accessible plant health monitoring.

CERTIFICATIONS

Microsoft AZ 204 | Certified Mid-Level Angular Developer | Claude 101 | Claude Code in Action | MongoDB Essentials Training | IBM AI Series
